

easy, low cost, solutions for safety testing
electrical appliances and RCDs

DUO

Functions

- combines all the functions of the miniPAT and the miniRCD tester
- it is operated in exactly the same manner and all indications are the same as the individual models
- earth resistance and earth leakage test
- polarity
- tests all 30mA RCDs
- automatically applies 15mA 'no-trip' test followed by 30mA 'trip' test
- displays trip time

Features

- easy, fast, accurate
- micro processor controlled technology
- automatic Class 1 and Class 2 earth leakage test
- automatic earth resistance test
- digital display
- automatic sequential testing of RCDs
- simple, one button press to start
- no dials or knobs to complicate things
- digital display shows either the time if it passes, or else FAIL
- successive tests alternate between 0 ° and 180 ° phase shift
- correct polarity is indicated by active/earth and active/neutral neon lights both illuminated
- 5 second delay after it is initially plugged into the mains while the internal capacitors charge

Specifications

- 240V ac mains operated
- Class 1 – 5mA earth leakage test
- Class 2 – 1mA earth leakage test
- 1 ohm earth resistance test
- 15mA and 30mA test currents applied
- meets the requirements of AS/NZS 3760

Instructions

The **easytest** DUO comes with simple instructions on the rear label. Portable appliance testing and RCD testing does not get any easier than this!

All this for only \$900* + GST & delivery when you buy direct from **easytest** Pty Ltd,

*RRP

*Wholesale prices upon application

*Patent Pending

**All testing must include a thorough physical and visual inspection for mechanical damage.*
