

easy, low cost, solutions for safety testing  
electrical appliances and RCDs

## MiniRCD Tester

### Functions

- tests all 30mA RCDs
- displays trip time
- automatically applies 15mA 'no-trip' test followed by 30mA 'trip' test

### Features

- automatic sequential testing of RCDs
- simple, one button press to start
- no dials or knobs to complicate things
- digital display shows either the time if it passes, or else FAIL
- successive tests alternate between 0 ° and 180 ° phase shift
- correct polarity is indicated by active/earth and active/neutral neon lights both illuminated
- micro processor controlled technology
- 5 second delay after it is initially plugged into the mains while the internal capacitors charge

### Specifications

- 240V ac mains operated
- 15mA and 30mA test currents applied automatically and sequential
- meets the requirements of AS/NZS 3760

### Instructions

The **easytest** miniRCD tester comes with simple instructions on the rear label. RCD testing does not get any easier than this!
